EDUCATION

Bachelor in Cognitive Science With Honours
University Malaysia Sarawak (UNIMAS)

- Current CGPA - 3.09
2024 - 2026

Malaysian HigherSchool Certificate (STPM)
SMK KINABUTAN TAWAU, SABAH

- CGPA - 2.98 | MUET - Band 3.00
2020 - 2023

TECHNICAL SKILLS

Mobile App Development: Flutter, Dart, Firebase Authentication, Firebase Firestore, Firebase Storage, API integration, app navigation, form validation, user authentication, and UI development.

Programming, Web Development & HCI: C++, HTML, CSS, JavaScript, MySQL, Jupyter Notebook, and user interface design based on Human-Computer Interaction principles.

Database Management: Firebase Firestore, MySQL, Microsoft Access, and basic database design including tables, relationships, queries, and data handling.

Software Development Projects: Developed academic and group projects such as mobile applications, database systems, user-centered interfaces, and final year project applications using Flutter, Dart, and Firebase.

Data Analytics & Visualization: Google Looker Studio (Excellent), Microsoft Excel (Excellent), Power BI (Basic), and Jupyter Notebook.

UX/UI & Human Factors: Human-Computer Interaction, Design Thinking, usability testing, user flow design, wireframing, and user-centered design principles.

Productivity & Documentation: Microsoft Word, Microsoft PowerPoint, report writing, system documentation, presentation slides, and project documentation.

Cognitive Science Knowledge: Cognitive Psychology, Human Cognition and Perception, Neuroscience and Brain Function, Decision-Making, and Human Factors.

INTERPERSONAL & SOFT SKILLS

- Excellent Team Collaboration & Professional Communication
- Strategic Problem-Solving & Critical Thinking
- Highly Adaptable & Resilient Under Pressure
- Strong Time Management & Organizational Skills
- High Emotional Intelligence & Positive Relationship Building

About Me

I am a motivated third-year Bachelor of Cognitive Science student, expected to graduate in November, with a strong interest in software development. I am seeking an entry-level Software Developer position where I can apply my knowledge in system analysis, human-computer interaction, cognitive technologies, and data processing. Through my academic projects, I have gained experience in designing user-centered systems, developing applications, and solving technical problems. Although I am still completing my final year, I am eager to begin my career journey, learn from real industry experience, and contribute positively to a development team as a fresh graduate candidate.

WORK EXPERIENCE

Rose Beautifull Scarf (Tawau, Sabah) - Part Time Tudung Sales Assistant
August 2024 – October 2024 | 17 February 2025 - 30 March 2025

- Promoted and sold various tudung styles via social media and in-person.
- Managed inventory, tracked sales, and resolved customer inquiries.
- Created Canva marketing posts and applied upselling techniques to boost sales.
- Handled basic budgeting and profit tracking for cost-effective operations.

Data Analytics Intern

ANGKASA (Apex Cooperative Organization of Malaysia) — 28 July 2025 – 3 October 2025

- Assisted in collecting, cleaning, and analyzing sales and financial data to support decision-making.
- Developed reports and dashboards in Google Looker Studio to track key performance indicators (KPIs).
- Conducted trend analysis to identify patterns and provided insights for monthly management meetings.
- Collaborated with supervisors to optimize monthly sales target tracking using Excel and Access.
- Gained hands-on experience with CAMEL's Analysis framework for project financial evaluation.
- Enhanced data accuracy and reporting efficiency by troubleshooting errors in datasets and formulas.

EXTRACURRICULAR

Treasurer – Cempaka Academic Club [2023 – 2024]

- Entrusted with managing the club's financial operations, including budgeting, fund allocation, and financial reporting.
- Played a key role in planning academic programs by ensuring efficient use of club resources.
- Strengthened financial accountability and developed strong organizational and decision-making skills.

Media & Publicity Team – Kelab SUCIE [2024 – 2025]

- Designed creative posters, social media content, and event announcements to boost student engagement.
- Collaborated with the event team to ensure effective communication and branding for club activities.
- Gained hands-on experience in digital content creation, teamwork, and public relations.

1st International Curricular Learning Experience 2024

- Contributed to event coordination, documentation and cross-cultural community.
- Gained valuable insights into international program management and collaborations workflows.

Registration & Participant Management Unit- EXCITE UNIMAS 2025

- Developed organizational, communication, and problem-solving skills while managing event participants.

Academic & Group Projects

TravelTawau Mobile Application — Final Year Project

Developed a tourism mobile application using Flutter and Dart to promote travel destinations, local attractions, and tourism services in Tawau. Designed user-friendly interfaces, structured app navigation, and implemented key features to improve accessibility for users exploring local tourism information. Applied Human-Computer Interaction principles, usability testing, and user-centered design to improve the overall user experience.

Satay Go Application — Flutter Social/E-Commerce Group Project

Designed and developed a Flutter-based social/e-commerce application for a local satay business as part of the project “Designing a Flutter Application for Social/E-Commerce Impact via the GDVRR Protocol.” Implemented core application features using Flutter, Dart, Firebase Authentication, and Firebase/Firestore database integration. Contributed to improving the app workflow, user interface, authentication process, and customer experience based on project requirements and feedback.

Student Digital Portfolio Management System — Microsoft Access

Developed a database management system to manage student digital portfolio records. Designed relational tables, relationships, queries, forms, reports, and database functions to support organized data storage and retrieval. Applied database design principles to improve record management and reporting efficiency.

Firefighter Information & Reporting Website — FlutterFlow + Database

Designed and developed a responsive web application for managing firefighter information and incident reports. Integrated database collections to support CRUD operations, including creating, reading, updating, and deleting records. Applied UI/UX design principles to create an intuitive interface and collaborated with team members to deliver a functional prototype within the project deadline.

Lung Cancer Dataset Analysis — Fundamentals of Data Mining

Cleaned and processed Kaggle’s Lung Cancer Patient Data using Jupyter Notebook for data mining tasks such as classification, clustering, decision tree analysis, and data visualization. Generated statistical summaries and visual patterns to support interpretation of healthcare-related data. Reflected on data ethics, model accuracy, and the implications of data-driven decision-making in healthcare.

Human Factors & Ergonomics Project — Car Dashboard Interface Axia 2023

Conducted usability evaluation on a car dashboard interface and intentionally created a “bad design” version to demonstrate human factors and ergonomics issues. Suggested design improvements based on HCI principles, usability guidelines, and user-centered design concepts.

E-Commerce Website — Web Programming

Designed and developed a dessert-themed restaurant e-commerce website to promote food products such as cakes, beverages, and pastries. Applied HTML, CSS, JavaScript, and Human-Computer Interaction principles to create visually appealing product categories and an intuitive user experience.

Practical Experience

ANGKASA Internship – Data Analyst- (July 2025 – Oct 2025)

- Transformed sales monitoring processes by building interactive dashboards in Google Looker, allowing managers to spot trends instantly and make faster decisions.
- Developed custom metrics and automated weekly tracking, reducing manual reporting time and cutting errors by over 20%.
- Collaborated closely with supervisors to align analysis with organizational targets — earning direct recognition for improving reporting accuracy and transparency.
- Presented insights that helped the team adjust monthly targets, boosting goal achievement rate and supporting better resource planning.
- Strengthened professional skills in data storytelling, report presentation, and translating numbers into actionable strategies.

Google Looker – Advanced Data Visualization

- Built real-time dashboards to track KPIs, sales performance, and weekly target completion.
- Designed dynamic filters and drill-down reports, empowering decision-makers to explore data on demand.
- Simplified complex datasets into clear visual narratives, making it easier for non-technical stakeholders to understand and act on insights.
- Leveraged Looker’s BI features to identify underperforming areas and provide data-driven recommendations.

ProjectLibre – Project Planning & Scheduling

- Created Gantt charts, task dependencies, and resource allocation plans to manage academic projects efficiently.
- Applied Critical Path Method (CPM) to identify bottlenecks and ensure all deliverables were met on time.
- Improved teamwork by visualizing project timelines, enabling clear communication of responsibilities and deadlines.
- Strengthened skills in time management and project risk analysis, preparing for real-world project coordination.
