PROFESSIONAL SUMMARY

Analytical and detail-oriented Cognitive Science final-year student at Universiti Malaysia Sarawak (UNIMAS) with a strong foundation in data analytics, database systems, and technical support operations. Demonstrates a proven track record during a Data Analytics internship at ANGKASA, focusing on data cleaning, KPI tracking, and dashboard creation. Technically proficient in MySQL, Google Looker Studio, Microsoft Access, and advanced Excel. Skilled at translating complex datasets into actionable business insights and optimizing manual reporting systems. Seeking an entry-level Data Analyst or IT Support position to leverage analytical skills and support robust technical operations.

TECHNICAL SKILLS

Mobile App Development: Flutter, Dart, Firebase Authentication, Firebase Firestore, Firebase Storage, API integration, app navigation, form validation, user authentication, UI development.

Web Development & Programming: HTML, CSS, JavaScript, C++, MySQL, Jupyter Notebook, basic front-end development.

Database Management: Firebase Firestore, MySQL, Microsoft Access, table design, relationships, queries, forms, reports, data handling.

Data Analytics & Visualization: Google Looker Studio, Microsoft Excel, Power BI, Jupyter Notebook, dashboard reporting, KPI tracking, trend analysis.

UI/UX & HCI: Human-Computer Interaction, Design Thinking, usability testing, user flow design, wireframing, user-centered design.

Productivity & Documentation: Microsoft Word, Microsoft PowerPoint, report writing, system documentation, presentation slides, project documentation.

EDUCATION

Bachelor in Cognitive Science with Honours | Universiti Malaysia Sarawak (UNIMAS) | 2024 - 2026

- Expected Graduation: November 2026

Malaysian Higher School Certificate (STPM) | SMK Kinabutan Tawau, Sabah | 2020 – 2023

WORK EXPERIENCE

Data Analytics Intern | ANGKASA (Apex Cooperative Organization of Malaysia) | July 2025 - October 2025

- Collected, cleaned, and analyzed sales and financial data to support management decision-making.
- Built Google Looker Studio dashboards to track KPIs, weekly sales performance, and target completion.
- Used Microsoft Excel and Access to improve monthly sales target tracking and reporting accuracy.
- Conducted trend analysis, identified data patterns, and prepared insights for management reporting.
- Troubleshoot dataset and formula errors, reducing manual reporting issues and improving data reliability.
- Gained exposure to the CAMELS analysis framework for financial and project evaluation.

Part-Time Tudung Sales Assistant | Rose Beautifull Scarf, Tawau, Sabah | August 2024 - October 2024; February 2025 - March 2025

- Promoted and sold various tudung styles through social media and in-person customer engagement.
- Managed inventory, tracked sales, handled customer inquiries, and supported basic budgeting.
- Created Canva marketing posts and applied upselling techniques to improve product visibility and sales.

ACADEMIC AND GROUP PROJECTS

TravelTawau Mobile Application | Final Year Project

- Developed a tourism mobile application using Flutter and Dart to promote travel destinations, local attractions, and tourism services in Tawau.
- Designed user-friendly interfaces, structured app navigation, and applied HCI principles to improve user experience.
- Conducted usability testing and applied user-centered design improvements based on feedback.

SatayGo Application | Flutter Social/E-Commerce Group Project

- Designed and developed a Flutter-based social/e-commerce application for a local satay business.
- Implemented core features using Flutter, Dart, Firebase Authentication, and Firebase Firestore database integration.
- Improved app workflow, authentication process, user interface, and customer experience based on project requirements.

Student Digital Portfolio Management System | Microsoft Access

- Developed a database system to manage student digital portfolio records using relational tables, relationships, queries, forms, and reports.
- Applied database design principles to improve organized data storage, retrieval, and reporting efficiency.

Firefighter Information and Reporting Website | FlutterFlow + Database

- Designed a responsive web application for managing firefighter information and incident reports.
- Integrated database collections to support CRUD operations and created an intuitive UI/UX prototype.

Lung Cancer Dataset Analysis | Fundamentals of Data Mining

- Cleaned and processed Kaggle Lung Cancer Patient Data using Jupyter Notebook for classification, clustering, decision tree analysis, and visualization.
- Generated statistical summaries and reflected on data ethics, model accuracy, and healthcare data decision-making.

Human Factors and Ergonomics Project | Car Dashboard Interface Axia 2023

- Conducted usability evaluation on a car dashboard interface and created a bad design version to demonstrate human factors and ergonomics issues.
- Suggested design improvements based on HCI principles, usability guidelines, and user-centered design concepts.

E-Commerce Website | Web Programming

- Designed and developed a dessert-themed restaurant e-commerce website using HTML, CSS, and JavaScript.
- Applied HCI principles to create clear product categories and an intuitive user experience.

LEADERSHIP AND ACTIVITIES

Treasurer | Cempaka Academic Club | 2023 - 2024

- Managed budgeting, fund allocation, and financial reporting for club activities.

Media and Publicity Team | Kelab SUCIE | 2024 - 2025

- Designed posters, social media content, and event announcements to support student engagement.

Registration and Participant Management Unit | EXCITE UNIMAS 2025

- Managed participant registration and strengthened communication, organization, and problem-solving skills.
